Treatment Glossary For Wedding-Ready Skin

Botox®

Our most popular treatment? Injectables! Smooth fine lines and help to prevent future signs of aging with our Wrinkle Reducer Treatment.

Chemical Peels

Want to be radically radiant? Try one of our chemical peels to exfoliate dead skin, revealing the best version of yourself. Chemical Peels help to minimize fine lines, pore size, discoloration, and acne marks.

Dermaplaning

Dermaplaning is a staff-favorite treatment. We use a medical-grade, exfoliating blade to gently remove facial peach fuzz and exfoliate the top layer of your skin so your skin and makeup appears flawless.

Laser Genesis

Our brightening laser is a non-invasive treatment to help restore what daily life can take from your skin. Perfect for routine maintenance or seasonal skin concerns, continue your day with brighter, more even-looking skin.

Microneedling with PRP

Our Microneedling with PRP treatment is a perfect reset for your skin. Using your body's own natural growth factors found in platelet-rich plasma, this treatment helps minimize pores, even skin's tone and texture, and increase collagen production for a healthy glow.

Oxygen Facial

Rejuvenate your skin with our Oxygen Facial for your face or back. You will be cleansed, exfoliated, and pampered leaving your skin smooth and glowing!
